PROFESSIONAL SUMMARY

Highly motivated certified Junior Cybersecurity Analyst with a validated foundation in offensive/defensive security principles, holding the **CompTIA Security+** certification and core knowledge in risk mitigation, threat management and operational security. Eager to leverage hands-on Ethical Hacking and strong soft skills—developed through customer-facing experience—to contribute immediately to security monitoring and vulnerability analysis within a dynamic IT environment.

LICENSES & CERTIFICATIONS

Certification/Course	Issuing Organization	Year
CompTIA Security+ (SYO-701)	CompTIA	September 2025
Ethical Hacker	Cisco Networking Academy	July 2025
Cybersecurity Essentials	Cisco Networking Academy	October 2025
AI Fundamentals with IBM Skills Build	Cisco Network Academy/ IBM SkillsBuild	June 2025
Microsoft Certified: SC-900	Microsoft (if achieved, mention here)	June 2025
English for IT	Cisco Networking Academy	June 2025

TECHNICAL SKILLS

Skill Area	Keyword
Security Operations	Threat Analysis, Vulnerability Management, Risk Mitigation, Security Policies, Network Segmentation, Incident Response (Fundamentals), Cryptography
Offensive Security	Penetration Testing Methodologies, Vulnerability Scanning, Reconnaissance, Post-Exploitation, Social Engineering (Fundamentals)
Operating Systems	Windows Environments, Basic Linux Command Line & Navigation
Networking	TCP/IP, Ports & Protocols, Firewalls, IDS/IPS, Data Communications, Networking Fundamentals
Cloud Security	Security, Compliance, and Identity Fundamentals (SC-900)

EDUCATION

National Certificate Vocational (NCV) Level 4 in Information Technology
Ekurhuleni West College, Germiston | 2021-2023

WORK EXPERIENCE

Store Associate | Mr Price Sport | Start feb/2024 – End jan/2025

- Security & Compliance: Maintained meticulous attention to detail in inventory management and cash handling procedures, directly translating to an ability to adhere to strict security policies and compliance standards.
- Proactive Problem-Solving: Solved high-pressure customer and operational issues independently, demonstrating the critical thinking required for quick identification and mitigation during a security incident.
- Leadership & Communication: Successfully trained and mentored junior staff members, proving effective communication skills essential for reporting technical issues to non-technical stakeholders.

PROJECTS & PRACTICAL APPLICATION

Cybersecurity Hands-on Labs (Ethical Hacking Focus)

- Applied offensive security methodologies in simulated environments to perform vulnerability analysis and network discovery using open-source tools.(Nmap 🕸/Scapy)
- Practiced secure configuration analysis on virtual machines to understand common weaknesses and implement hardening strategies (directly supporting Security+ principles).
